The Siriraj Hospital at Mahidol University in Bangkok, Thailand was established in 1889 as Thailand's first medical school and the Siriraj Hospital, founded in 1888, was the first public hospital in Siam. It is a tertiary medical center teaching hospital and prides itself on providing exemplary medical services with interdisciplinary, comprehensive and compassionate care. As a leading medical institute accredited with international standards, the Faculty of Medicine Siriraj Hospital is eager to share global perspectives on education, health care and research. Pediatric residents from UCLA have worked closely with the Pediatric Infectious Disease Service caring for patients under the supervision of a US-trained pediatric ID specialist and participating in learning and teaching opportunities. Residents have also observed in the multiple subspecialty pediatric clinics. This is a chance to learn about tropical medicine from US trained physicians in an incredibly interesting and beautiful setting.

Bangkok is a beautiful place to visit and is the capital city and largest urban area in Thailand. Visitors may initially be overwhelmed by the heat, humidity, traffic and chaos of the city but quickly discover the warmth of the people, delicious Thai food and tropical fruits, and beautiful architecture. Bangkok is a tropical metropolis that is also one of the most traveler-friendly cities in Asia.
