

Department of Epidemiology Seminar Series

"Bridging the gaps: An Implementation Science approach to deliver PrEP to pregnant and breastfeeding women with high risk for HIV acquisition in South Africa"

Dr. Dvora Davey

Adjunct Assistant Professor,
Department of Epidemiology,
Fielding School of Public Health,
UCLA

Dr. Joseph Davey is an HIV epidemiologist whose research focuses on how best to prevent and treat HIV and other sexually transmitted infections in peri-conception, pregnant women and couples, as well as other vulnerable populations. She has expertise in study design and use of epidemiological methods to inform interventions aimed at reducing the burden of HIV and related diseases. She is the Principal Investigator on a cohort study of pre-exposure prophylaxis (PrEP) in pregnant and breastfeeding women in Cape Town (Fogarty International Research Science Development Award K01) and co-Investigator on the corresponding clinical trial (NIMH R01). She is an Adjunct Assistant Professor in the Department of Epidemiology at UCLA, and Honorary Senior Lecturer of Epidemiology at the University of Cape Town, where she teaches epidemiology courses and mentors MPH and PhD students.

December 10 from 12-1 pm

Location: The Bel-Air Room (CHS 17-323)

Lunch will be served!
