Applicants must have completed a residency in child or adult neurology by the start of the fellowship and be eligible for a license to practice medicine in the state of California.

**FELLOWSHIP OVERVIEW**

The UCLA Steve Tisch BrainSPORT (Sport concussion, Prevention, Outreach, Research and Treatment) Program is a multidisciplinary research-based treatment center for youth sport concussions. This is a two-year fellowship that involves intensive clinical and research training on the diagnosis and treatment of traumatic brain injury (TBI), with emphasis on pediatric sports concussions and with exposure to adult mild TBI in outpatient settings.

**CORE TRAINING:** Fellows receive broad clinical training including: outpatient diagnosis and treatment of concussion and post-concussive symptoms, pre-season baseline testing, sideline neurological evaluation, peripheral neurology due to sports injury as well as some experience with more severe TBI resulting from sports/recreation.

Fellows will be expected to:

- Participate in at least one clinical or basic science research project within the Departments of Pediatrics, Neurology, or within the UCLA Brain Injury Research Center (BIRC)
- Submit at least one publication *dedicated research time is built into both years of the training program

BrainSPORT serves a diverse patient population; we have relationships with various collegiate and professional athletic programs in addition to close partnerships with the U.S. Military and U.S. Department of Veteran Affairs, through UCLA Operation Mend.
