Minimum Security Standards, HS 9457

PURPOSE

This policy outlines the required technical configuration standards for Devices (Workstations, Servers, Networking Equipment, etc.), applications and systems connecting to UCLA Health Sciences Electronic Information Resources. These requirements are intended to protect the confidentiality, integrity and availability of Restricted Information and for patient care, education, research and other business purposes.

SCOPE

This Policy applies to all faculty, staff, employees, students, trainees, and volunteers of the Ronald Reagan UCLA Medical Center, the Santa Monica UCLA Medical Center and Orthopaedic Hospital, the Resnick Neuropsychiatric Hospital at UCLA, the Faculty Practice Group, all ambulatory clinics, the David Geffen School of Medicine, the UCLA School of Nursing, the UCLA School of Dentistry, and the UCLA Fielding School of Public Health (hereafter referred to as "UCLA Health Sciences").

In addition, it applies to suppliers, contractors and other non-workforce members who working with or on behalf of UCLA Health Sciences.

POLICY

- I. **All Devices used to access UCLA Health Sciences Electronic Information Resources, whether owned by UCLA or others, and including but not limited to PCs, laptops, workstations, servers, smart phones, and tablets, must:**
 - A. **Be kept up to date on application and operating system supported versions and up to date on security patches**
 Devices shall run versions of operating systems and application software for which security patches are made available in a timely manner.
 - B. **Use anti-malware software and keep it up to date**
 Devices shall be continually executing approved malware-scanning software with current definitions.
 - C. **Use a password-protected screen saver or lock screen that comes up after 15 minutes of inactivity**
 Devices must be secured with a password-protected screen saver or lock screen with the automatic activation feature set at 15 minutes or less or by automatic log off after 15 minutes of inactivity.
 - D. **Use the host-based firewall**

Devices that include native host-based firewall software in the operating system should have the firewall activated and properly configured.

E. Run any additional required security software

Any additional security software specified in the [Health Sciences Security Software Standard](#) must also be installed.

F. Comply with the Health Sciences Standards listed below:

[Health Sciences Vulnerability Management Standard](#)

[Health Sciences Device Configuration Standard](#)

[Health Sciences Wireless Communications Standard](#)

[Health Sciences Data and System Integrity Standard](#)

[Health Sciences Network Device Configuration Standard](#)

- II. UCLA Health Sciences shall where possible terminate web or other application sessions after a short period of inactivity no longer than 15 minutes.
- III. To prevent password harvesting, passwords must not be sent in clear text and all Devices and applications must use encrypted authentication mechanisms or other secure authentication mechanisms.
- IV. Restricted Information transmitted over the Internet or wireless networks must be encrypted according to the [Health Sciences Data-in-Motion Encryption Standard](#).
- V. Devices that cannot be protected in the required manner (virus scanning, spyware/adware protection, patch updates, secure configuration) must be located in protected subnets or isolated by other approved means. Such systems would include, but would not be limited to, turn-key systems on which the vendor prohibits any 3rd party software and operating system patches, and legacy systems that cannot be updated.
- VI. Where appropriate, UCLA Health Sciences shall install firewalls, intrusion prevention software and other security measures to reduce the threat of unauthorized remote access.
- VII. In order to maintain the integrity of UCLA Health Science networks, any Device which has been compromised or attempts to compromise any other Device may be disconnected from the network without prior warning. The IT Support group must be informed of the compromise and disconnection as soon as possible so that the users of the system can be notified and remedial actions can be initiated.
- VIII. Devices that do not meet the requirements of this policy and have not been granted exceptions may be blocked from access to UCLA Health Sciences Electronic Information Resources.
- IX. UCLA Health IT shall maintain inventories of UCLA-owned computing and network Devices.
- X. Effective and efficient information security measures shall be integrated into systems and/or applications from the beginning of their development or implementation as required by the [Health Sciences Secure System Development Life Cycle \(SDLC\) Standard](#).
- XI. Risk assessments shall be performed for new Devices and applications before initial go live and after any major changes as required by the [Health Science Risk Assessment Standard](#)
- XII. **Sanctions**
Failure to follow any provisions of this policy may result in disciplinary action, up to and including termination.
- XIII. **Policy Exceptions**
Any exceptions to this policy must be for a valid patient care or business reason and must be approved by the Chief Compliance Officer or his/her designee. The Chief Compliance Officer or designee will consult

with the appropriate business, leadership and IT groups in evaluating any proposed exceptions. The exception request form can be found [here](#).

XIV. Questions

- A. For information on how to implement these requirements, contact Customer Care at 310-267-CARE (2273).
- B. For questions on this policy or to request exceptions, contact the Office of Compliance Services - Information Security (CompOffice@mednet.ucla.edu).

APPENDIX I – DEFINITIONS

"Electronic Information Resources" includes, but is not limited to, computer equipment (servers, workstations, laptops and other portable computers), online services, medical devices, mobile devices (tablets, smart phones, digital cameras, etc.), applications (Electronic Health Record, email, databases, other software), storage media (USB drives, DVDs, CDs, magnetic tape, memory cards), and networks.

"Protected Health Information" or "PHI" is any individually identifiable health information, in any form or media, whether electronic, paper, or oral. "Individually identifiable" means that the health or medical information includes or contains any element of personal identifying information sufficient to allow identification of the individual, such as the patient's name, address, electronic mail address, telephone number, or social security number, genetic or other information that, alone or in combination with other publicly available information, reveals the individual's identity. PHI includes medical information; patient billing and health insurance information; and applies to a patient's past, current or future physical or mental health or treatment.

"Electronic Protected Health Information" or "ePHI" is PHI that is transmitted by electronic media or is maintained in electronic media. For example, ePHI includes all data that may be transmitted over the Internet, or stored on a computer, a CD, a disk, magnetic tape or other media.

"Personal Information (PI)" as used in this policy means either of the following:

1. An individual's first name or first initial and last name in combination with any one or more of the following

data elements when either the name or the data elements are not encrypted:

- A. social security number,
 - B. driver's license number or California identification card number,
 - C. account number, credit, or debit card number, in combination with any required security code, access code, or password that would permit access to an individual's financial account,
 - D. medical information, or
 - E. health insurance information, or
 - F. information or data collected through the use or operation of an automated license plate recognition system as defined in the California Civil Code §1798.90.5; or
2. A user name or email address, in combination with a password or security question and answer that would permit access to an online account

"Medical Information" means any individually identifiable information, in either electronic or physical form, regarding an individual's medical history, mental or physical condition, or medical treatment or diagnosis by a health care professional, and which may be in the possession of or derived from a health care provider, health care service plan, pharmaceutical company or contractor.

"Health Insurance Information" means an individual's health insurance policy number or subscriber identification number, any unique identifier used by a health insurer to identify the individual, or any information in an individual's application and claims history, including any appeals records.

"Restricted Information" describes any confidential or Personal Information that is protected by law or policy and that requires the highest level of access control and security protection, whether in storage or in transit. This includes Personal Information, PHI and ePHI as defined in this section but could also include other types of information such as research data.

"Account" is an identity used to gain access to a particular computer, system, or application.

"Device" means a computer, printer, wireless appliance, or other piece of equipment that can access UCLA Health Sciences Electronic Information Resources. Devices would include, but are not limited to, laptops, PDAs, web servers, databases, file and other application servers, and medical and other devices with network connectivity.

"Networking Equipment" means devices that facilitate the use of computer networks, including, but not limited to, routers, switches, bridges, firewalls, intrusion prevention systems, gateways, VPN, wireless access points and other network appliances.

"Password" is an authorized user's unique combination of numbers, letters, and/or symbols created by the user and used to securely access UCLA Health computer, network, application, or other Electronic Information Resources.

"Server" is a Device that provides some service for other Devices connected to it via the network.

"User" is anyone who holds a valid account on a UCLA Health network, computer, remote access and/or e-mail system.

"Workstation" is defined for the purposes of this policy as a UCLA Health desktop or laptop computer.
