

Pyxis Medstation ID/Password Assignment

Attestation

I understand my CareConnect ID will be used for access to the Pyxis medstation system (if my job description allows). I understand that my ID in combination with either my password or my BioID (fingerprint) will be my electronic signature for all of my transactions on the Pyxis medstation for patient care record keeping purposes. A time and date stamp will be affixed to all of my transactions. The records of my transactions will be maintained and archived as per the policies of the UCLA Health System and will be available for inspection by the UCLA Health System as well as State and Federal regulatory agencies such as the Department of Public Health and the Drug Enforcement Administration (DEA).

I also understand that to maintain the integrity of my electronic signature, I must not and will not give my personal password to any other individual. Unauthorized access, release or dissemination of this information may subject me to disciplinary action. Should I have any suspicion that my personal password has become known to another individual, I will change it immediately and if deemed appropriate will immediately report such to my supervisor.
