The UCLA Department of Pediatrics was founded in 1950, and the Marion Davies Children’s Health Center construction was completed in 1962. In 2008, UCLA was proud to open the Ronald Reagan Medical Center, and the state-of-the-art UCLA Mattel Children’s Hospital. In addition, over the years our affiliations have grown to include UCLA Santa Monica Medical Center, Harbor-UCLA Medical Center, Olive View-UCLA Medical Center, and Miller Children’s & Women’s Hospital. Our mission is to deliver leading edge patient care, research and education.

Known worldwide for its research and expertise in complex medical care, Ronald Reagan UCLA Medical Center and its J.M. Peri designed facility is ranked year after year “Best in the West” by U.S. News and World Report’s annual survey of “America’s Best Hospitals.”

Affiliated Programs
Notable affiliated programs include:
- UCLA FIT for Health Program
- UCLA Global Health Education Program
- Palliative Care Transition Program
- Child Development
- RAND
- UCLA Center for Healthier Children
- Families and Communities

Subspecialty Divisions
- Adolescent Medicine
- Allergy/Immunology/Rheumatology
- Cardiology
- Critical Care
- Developmental Behavioral Pediatrics
- Endocrinology
- General Pediatrics
- Gastroenterology
- Hematology/Oncology
- Infectious Disease
- Medical Genetics
- Neonatal/Perinatal Medicine
- Nephrology
- Neonatology
- Pediatric Hospital Medicine
- Pulmonology

Faculty and Staff
- More than
- 150 Faculty Members
- 400 Staff Members

Living in Los Angeles
Explore incredible Los Angeles. Known for much more than the beach and sun, the city is a diverse hub of cultural events, gastronomic enticements, sports activities and outdoor life. You can mountain bike in Malibu Creek State Park; hike in the Angeles National Forest; ski at Snow Valley; or sail through the Channel Islands. And if you are a foodie, L.A. is the place for dim sum, Korean BBQ, and inventive cuisines that haven’t been “discovered” yet. Or just sit in the sun—in February—and sip coffee at an outdoor cafe. And on weekends, trips to Santa Barbara, San Diego, Las Vegas, and national parks like Sequoia-Kings Canyon or Joshua Tree in the desert are all just a few hours away.

The best part of my job is being a part of the training experience, to support and mentor such a diverse, talented, and committed group. I am inspired every day by the work they do and consider myself honored to partner with and train such a unique, talented, and committed group.
—Alan Chin, MD, Director

Your Pediatric Residency at UCLA Mattel Children’s Hospital

Residency Tracks
Several unique tracks, which can be customized for individual interests, are offered:
- Fellowship in Hospital-based Medicine
- Public Health and Primary Care (including focus on health equity, disparities, and underserved populations)
- Global Health and Underresourced
- Physician Scientist
- Child Neurology
- Medicine-Pediatrics

Pediatric Education
There are a variety of methods by which residents receive a formal didactic education. UCLA’s program focuses on highlighting the unique clinical experiences at each training site by tailoring didactics in a manner that facilitates learning. For example, our UCLA noon conference series is organized by the American Board of Pediatrics board exam content specifications matching the subspecialties at an academic children’s hospital.

Areas of Curricular Innovation
- Curriculum focuses on the underserved populations in California
- Physician Scientist
- Public Health and Primary Care (including focus on health equity, disparities, and underserved populations)

Areas of Program Initiatives
- Trainee mentorship
- Advocacy with a focus on city, regional, statewide, and national advocacy training
- International electives, including funding for travel
- Resident as teacher curriculum to improve peer teaching
- Curriculum focus on the underserved patient populations in California

About Half of Our Residents Pursue Fellowships in Pediatric Subspecialty Fields and About Half Go into General Pediatric Primary Care Medicine. We Aim to Provide a Balanced, Comprehensive Pediatric Education with Excellent Faculty Guiding Residents to Practice at the Top of Their Licenses. Our Graduates Are Prepared to Be Pediatric Leaders of the Future and Meet the Changing Needs of Children and Families.

WHAT DO UCLA RESIDENTS DO AFTER GRADUATING?
Each year of residency builds upon the foundation established the previous year, with graded and progressive responsibilities in both inpatient and outpatient areas.
