Lippincott **Advisor**[®]

Immediate, evidence-based answers and guidance at the point-of-care.

The Right
Answers.
Right Now.

Lippincott **Advisor**

The single source for the latest online, evidence-based, clinical-decision support for nurses

Lippincott Advisor provides you immediate access to the information nurses need most. The industry's leading clinician-based online resource is designed for the point-of-care environment, and can provide the most current evidence-based information needed to practice with confidence.

Lippincott Advisor provides both "bedside" support (covering diseases, drugs, diagnostic tests, and patient teaching) and "clinical best practice" support (with guidelines for topical issues like Core Measures, Nursing Care Plans, Sentinel Events, and Cultural Perspectives).

Designed to easily integrate into EMR-based clinical workflow, Lippincott's powerful search engine delivers the right answers instantly, covering a wide range of topics in a single-source application, allowing you to spend less time searching and more time on patient care.

*Includes FREE MOBILE ACCESS
for your facility!*

Authoritative. Comprehensive. Single Source.

Lippincott Advisor brings trusted healthcare information to the clinical staff with an intuitive user interface that enhances assessment and critical-thinking skills. Helping clinicians find answers fast, while supporting EMR-based care delivery, **Lippincott Advisor** helps support the Meaningful Use goals to provide better access to complete and accurate health information, to ultimately improve outcomes.

Point-of-Care Benefits:

- Instant access to evidence-based clinical information at the point-of-care
- Easy EMR integration
- Compatible search functionality with *Lippincott Procedures*
- Compliance with current national guidelines
- Standardized care delivery

*“Lippincott Advisor is
my bread and butter.
I look at it every day.
For me it’s vital.”*

—Andrea McCleary, RN, BSN, MAOM,
Director of Education at Hilton Head Hospital

- National Guidelines
- National Patient Safety Goals (**New!**)
- Sentinel Events
- Hospital-Acquired Conditions
- Communication
- Cultural Perspectives

Putting Evidence To Work

Get the quickest and most reliable answers when you need them, wherever you are.

Lippincott Advisor is designed for instant access to the information that nurses need most. With on-the-spot answers to questions about diseases, diagnostic tests, treatments, signs and symptoms, and other clinical details, **Lippincott Advisor** provides immediate, evidence-based answers to clinicians' most pressing health information questions, using a synoptic search. This functionality eliminates the need to wade through pages of irrelevant and unreliable Internet search results or lengthy lists of book and journal hits.

For Deeper Dives

If further research is required, **Lippincott Advisor** is supported by integrated hyperlinks to PubMed and your institution's library holdings. In addition, **Lippincott Advisor** has its own health library of over 30 clinician reference texts such as *Lippincott Manual of Nursing Practice* (Nettina), *Cardiac Nursing* (Woods, et al), and *Wallach's Interpretation of Diagnostic Tests* (Williamson & Snyder).

Ensuring Competency

New! **Lippincott Advisor** now includes tests and assignment capabilities, so users can easily assess, track and validate clinical competency at the bedside. Currently available in Patient Teaching Navigator and Diseases & Conditions, this functionality will be expanded for additional content sets later in 2017.

Always Current

Regular and routine updates ensure nurses have access to the latest evidence, the latest guidelines, and the latest best-practice information.

Customizable

Append with custom notes or add completely new protocols as needed.

Improving Patient Satisfaction

New! The recent Patient Teaching Navigator add-on to **Lippincott Advisor** includes general teaching guidance for clinicians, as well as instruction on specific learning scenarios for patients.

Lippincott Advisor helps to improve:

- Quality of care
- Standardization
- Nurse confidence and autonomy
- Patient outcomes
