Lippincott Procedures

Delivers What You Need Most—Results

Lippincott Procedures, your web-based, go-to source for step-by-step clinical guidance, has over 1,700 procedures and skills from a wide variety of nursing specialties including medical-surgical, critical care, obstetric, pediatric, neonatal, ambulatory care, pediatric intensive care, perioperative, oncology, behavioral health, and long-term care. In addition, it also includes allied health procedures for respiratory therapy and physical therapy.

This comprehensive, institutional software application delivers the most trusted, evidence-based clinical content, combined with powerful online workflow functionality, that enables you to create, manage, review, practice, and maintain your organization's procedures seamlessly.

Designed to easily integrate into your current workflow from mobile and desktop devices, **Lippincott Procedures** is clinically focused and updated regularly, providing instant access to evidence-based best-practice information that empowers clinicians to standardize care, achieve clinical excellence, and improve patient outcomes.

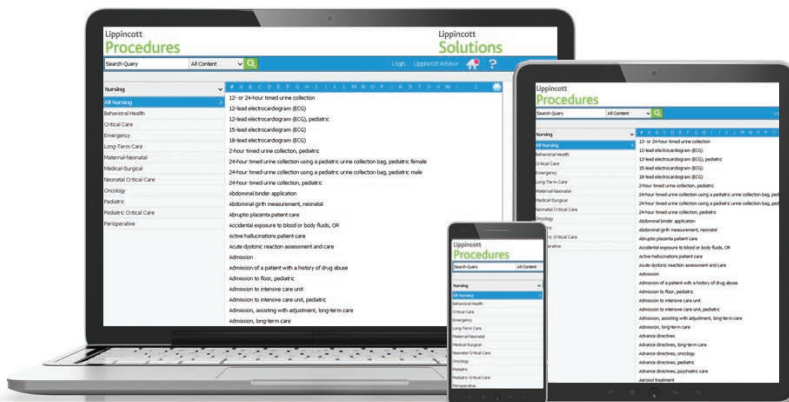

*Includes FREE MOBILE ACCESS
for your facility!*

Point-of-Care Benefits:

- Promotes more effective intercollaborative professional practice
- Empowers clinicians with the knowledge and confidence to make more informed clinical decisions
- Maintains compliance with current national guidelines
- Improves patient outcomes, reduces errors, and promotes consistent, standardized care across your organization

Advancing Clinical Excellence

Delivering the most trusted clinical content from Wolters Kluwer, this continually expanding product is designed to connect users to critical information faster. You can either scroll through content or use hyperlinks to get to essential information in an instant. And **Lippincott Procedures** is fully customizable, too, allowing you to adapt the latest evidence-based best-practice procedures or add unlimited custom procedures that best suit the individual needs of your organization.

This essential point-of-care guide will provide you with:

- Detailed procedural instructions using the latest evidence-based practices
- Superb visual guidance with hundreds of video clips and full-color images
- Quick lists that provide a brief procedure overview for quick bedside reference
- Easy browse-and-search functionality to quickly find the procedure you need
- Regular updates with the latest clinical evidence
- Clinical skills checklists and tests to ensure nurse competence and confidence.

Standardizing Patient Care

Lippincott's clinical decision support solution easily shares procedural information across your entire organization, enabling your clinicians to perform critical techniques consistently, resulting in high-quality, standardized patient care.

Standardizing care can help facilities improve efficiency, foster greater patient safety, enhance the quality of patient care, and improve interdisciplinary communications as well.

Delivering Evidence-Based Practice

By regularly searching all available data for the latest research, evidence-based practices, guidelines, and regulations, using our extensive team of contributing nurses and subject-matter experts, we're able to review and update the entire product throughout the course of the year, breathing new life into your policy and procedures manual and saving organizations considerable time.

Improving Nurse Competence

Lippincott Procedures has superior training and administrative tools that enable critical techniques to be taught, learned, and managed consistently. Competency tests, assigned and tracked through Lippincott's administrative functions or via an integrated learning management system (LMS), provide clinical educators and nurse managers the opportunity to test a clinician's understanding prior to patient care.

Our online skills checklists can be administered by supervisors or preceptors to document the ability of a clinician to perform skills appropriately. Full tracking of results allows clinical educators and managers to evaluate additional learning needs and provide remediation.

Raising The Standard

Lippincott Procedures supports your organization in meeting the criteria established by many of the leading healthcare accreditation and recognition programs, including The Joint Commission, The Magnet Recognition Program®, Malcolm Baldrige National Quality Award criteria, and the U.S. News Best Hospitals list.

The product promotes outstanding clinical care and best practices that keep clinicians prepared for reviews and unannounced site surveys.

"We love having Lippincott when it comes to Joint Commission and CMS visits. When CMS recently had a question about a policy of ours, we told them that 'we use Lippincott'. They immediately replied, 'Great, then we know it's definitely up to date.'"

—Tara Baker, RN, BSN Clinical Educator, Meritus Medical Center

Saving Time

By implementing **Lippincott Procedures**, your organization also saves precious time by:

- Eliminating time spent creating, writing, reviewing, and tracking all procedures
- Providing immediate access to trusted clinical information
- Training staff on policies, procedures and skills
- Evaluating staff competency and adherence to standards

LMS Integration

Lippincott Procedures integrates into most LMSs that support AICC. This dynamic product also provides robust assignment capabilities, enabling an administrator to electronically assign both tests and checklists to their staff members, create curriculum, automatically reassign for multiple attempts, view results, and send reminders and incompleteness/failure notification to managers for further remediation.

Always Current.
Always Evidence-based.
