

IMPROVING MATERNAL AND CHILD HEALTH TOGETHER

RESEARCH PARTICIPANTS NEEDED!

JOIN OUR TEAM

Our team of physicians and scientists are committed to finding solutions to improve both maternal and child health by further understanding risk factors of perinatal disorders.

Your willingness to donate biospecimens will significantly contribute to preventing non-favorable pregnancy outcomes and further decrease the risk of pregnancy complications.

ABOUT THE STUDY

In order to provide advancements regarding this research, the most important participant is **YOU!**

We work with the Pathology department to collect and analyze biospecimens such as...

- **Blood**
- Urine
- **Breastmilk**
- **Placenta**
- **Umbilical cord**

ELIGIBLE PARTICIPANTS

- Pregnant and postpartum birthing persons aged 18+ with perinatal pathology
- Healthy pregnant and postpartum birthing persons
- Healthy non-pregnant birthing persons (healthy volunteers)

Written informed consent is required to participate
