

WESTWOOD UPDATE:

RRUMC Interventional Radiology Equipment Upgrade Pardon Our Noise and Dust

Construction is in progress on the second floor of Ronald Reagan, UCLA Medical Center IR3 Room 2106 to install new state-of-the-art Philips equipment for the Department of Interventional Radiology (IR). The project includes Booms to support lead shielding, surgical lighting and monitors, as well as structural upgrades to sustain the weight of the new machine. Thank you for your patience as the upgrade requires extensive coordination and continued noise impacts to the hospital. This new IR system installation will be “one of a kind” on the west coast. UCLA Health remains committed to offering exceptional patient care using the latest technology available.

SANTA MONICA UPDATE:

SMUMC Staff Sleep Room Construction in Progress

Construction is underway to add eight additional sleep rooms and two staff restrooms with showers on the first floor of the Merle Norman Pavilion at Santa Monica, UCLA Medical Center. The interior alteration modernizes approximately 1,233 SF of existing space and is part of UCLA Health’s commitment to provide suitable accommodations to the growing number of staff who work multiple shifts, often overnight, or must respond to the hospital within a designated time. Thank you for your continued patience during construction.

SMUMC NW 2nd Floor Pharmacy Phase 1 of 3 Complete

Phase 1 of the SMUMC North Wing 2nd Floor Pharmacy project is complete and waiting for licensing by the California Department of Public Health and the Board of Pharmacy. The license is anticipated to be obtained by summer 2020, when the Department of Pharmacy will move from the basement and the 2nd floors to their new location in Suite 2260. Phase 2 will begin once the move is complete and includes renovation of the existing pharmacy space to convert it into a lactation room, a restroom and storage. Phase 3 will renovate the basement to provide high-density shelving to be used by the Department of Pharmacy and office space. Thank you to all Santa Monica surrounding clinics and functions, especially the cafeteria and post-operative departments, for your patience, cooperation and collaboration during this highly anticipated construction project.

SMUMC Emergency Department Renovation Project Complete

All three phases of the SMUMC ED Waiting Room and Administrative Office remodel are complete. The project expanded the existing entryway to the ED, provided a new reception and waiting area, security desks, removed partitions in the waiting room, and modified the door between the waiting room and clinic space for egress purposes. This project details the organization's commitment to improve clinical workflow and update hospital standards in compliance with current building code.

OFF CAMPUS UPDATE:

UCLA Health Malibu Immediate Care Clinic Open for Patient Care

In December 2019, UCLA Health opened an Immediate Care Clinic in Suite 301, adjacent to the existing Primary Care Suite, at 23815 Stuart Ranch Road in Malibu. Approximately 2,000 SF of renovated space includes five exam rooms with services including newborn care, well care for children and adults, well woman care, same day sick appointments, radiology, phlebotomy and behavioral health. The design features an open and inviting floor plan with lots of natural light. Natural materials like warm wood paneled walls and ocean-themed artwork make a fitting palette for the beachside community.

The U.S. Green Building Council Certifies Calabasas Medical Office Building Suites 330-370 LEED Gold

The U.S. Green Building Council has awarded LEED GOLD certification to the 26585 Agoura Road Suites 330-370 Tenant Improvement project (EIMG, Pediatrics and Lab) in Calabasas. The LEED program, or Leadership in Energy and Environmental Design, is helping change the way we think about how buildings and communities are planned, constructed, maintained and operated to minimize negative impact to occupants, the community and the planet. UC policy requires major renovations to be certified Silver and attempt Gold. In order to obtain the award, the team specified LED light fixtures and outlets on occupancy sensors, Energy Star Rated equipment, energy-efficient HVAC systems, low-flow plumbing fixtures, sustainable building materials and waste diversion. Approximately 12% of construction materials on the renovation contained recycled content, 40% was manufactured within 500 miles of the project, and 83% of the wood used on the project was certified to have been responsibly forested by the Forest Stewardship Council. The certification exemplifies UCLA Health's continued commitment to sustainability and pursuit of "Net Zero" by 2025.
