We Are Ready For You
Diagnostic Imaging and Interventional Care Available

UCLA Radiology is ready and prepared to welcome back all patients for imaging and interventional care. This includes patients who deferred routine imaging studies or procedures, as well as patients who require urgent or ongoing attention. Keep your health care on track. Schedule an appointment today.

Keeping you safe
We have rigorous infection prevention policies in place in all of our sites:

- Diagnostic COVID-19 testing for patients prior to most interventional procedures
- Pre-screening for patients, visitors and staff before they enter a medical clinic or hospital, which includes a temperature check and symptom monitoring
- Visitor restriction policies
- Universal masking
- Physical distancing in all shared spaces
- Enhanced disinfection and sterilization procedures in exam rooms, on all machines after every patient, and on high-touch surfaces, such as elevator buttons and digital screens

SCHEDULING
We urge you to schedule the routine, preventive and diagnostic imaging studies you need. We can offer a telemedicine appointment or video visit, if appropriate.

DIAGNOSTIC RADIOLOGY SCHEDULING
Patient line: 310-301-6800
Fax: 310-794-9035

INTERVENTIONAL RADIOLOGY SCHEDULING
