

ATLAS Project Information Template

Please use the following template to provide your project information when submitting your access request in Collibra in the "intended usage" field. Please note this information will be collected and shared with other UCLA Researchers in the [ATLAS Project List](#). By submitting your access request you are agreeing to sharing this information.

Required Information

1. Project Title(s)

Please provide the complete title or titles for your project(s)

2. Project Aim(s)

Describe the primary objectives and goals for your research project(s)

If Applicable

1. Genetic Analysis and/or Tool

Examples include:

- *GWAS (Genome-Wide Association Studies)*
- *Polygenic Risk Score*
- *Targeted Single Gene Analysis*
- *CNV Analysis (Copy Number Variant Analysis)*

2. Genetic Loci of Study

Specify the genetic locations or markers being investigated, such as:

- *BRCA2*
- *rs76992529*

3. Clinical Field(s) of Study

Identify the medical specialties or clinical areas relevant to your research:

- *Cardiology*
- *Neurology*
- *Oncology*
- *Psychiatry*

4. Clinical Disease(s) of Phenotype(s)

List the specific conditions, diseases, or traits being studied:

- *Parkinson's Disease*
 - *Diabetes*
 - *Cardiovascular disease*
 - *Mental health conditions*
-

This template provides a structured format for documenting essential project information. Complete all mandatory sections and include applicable sections as they relate to your specific research project.
