

WHERE DISCOVERY LEADS TO WORLD- CLASS CARE.

UCLA Health is among the most comprehensive and advanced health care systems in the world.

Our mission is to provide state-of-the-art patient care, generate research discoveries leading to new treatments and diagnoses, and train future generations of health care professionals.

FOUR HOSPITALS

- Ronald Reagan
UCLA Medical Center
- UCLA Mattel
Children's Hospital
- Stewart and
Lynda Resnick
Neuropsychiatric
Hospital at UCLA
- UCLA Santa Monica
Medical Center

MORE THAN 270 CLINICS

offering primary and specialty care services throughout Southern California and the Central Coast.

We enhance access by providing care at

- California Rehabilitation Institute
- 12 immediate care locations
- Homeless Healthcare Collaborative mobile vans
- Numerous affiliate sites and community-based programs including Venice Family Clinic, Harbor-UCLA Medical Center and others

UCLA HEALTH HOSPITALS
CONSISTENTLY RANK
AMONG THE BEST.

#1

IN CALIFORNIA
AND #1 IN LOS ANGELES*

in the most recent annual assessment by *U.S. News & World Report*.

FOR 34

CONSECUTIVE YEARS

we have earned a spot on the *U.S. News & World Report* national honor roll, a distinction reserved for the relative few providing the highest-quality care across multiple specialties.

Innovation & Research

Our doctors and scientists are pioneering work in an astounding range of disciplines.

In the most recent fiscal year, the medical school research program received

\$1.1

BILLION
IN AWARDS
INCLUDING

\$525 MILLION FROM THE

NATIONAL INSTITUTES OF HEALTH.

UCLA Health offers access to technology and treatments that may not be available elsewhere.

CANCER CARE:

Since 2014 alone, the U.S. Food and Drug Administration (FDA) has approved 18 therapies that were developed through research conducted in UCLA labs or clinical trials in UCLA Health clinics. UCLA Health Jonsson Comprehensive Cancer Center is ranked #1 in cancer care in California by *U.S. News & World Report*.

TRANSPLANTS:

Consistently among nation's leaders in annual number of solid organ transplants.

GENE THERAPY:

Successful clinical trials to treat pediatric severe combined immunodeficiency (bubble baby disease).

TISSUE MATCHING:

Faculty member developed tissue-matching test that made organ transplants possible.

BRAIN MAPPING:

UCLA researchers pioneered this field.

AIDS:

UCLA physicians reported, described first cases.

STROKE:

Faculty created devices to stop bleeding from aneurysm, remove blood clots; UCLA has first mobile stroke unit on West Coast.

NOBEL PRIZE:

Faculty member demonstrated signaling properties of nitric oxide, making possible new medications for heart disease, impotence.

COVID-19 TESTING:

Among first academic health systems to develop own diagnostic test, receive FDA authorization.
