

YOUTH & YOUNG ADULTS NEEDED FOR RESEARCH

Dr. Aldrovandi and Dr. Olson-Kennedy are conducting a research study with youth and young adults at Children's Hospital Los Angeles.

We are looking at how the good bacteria, viruses, and fungi in your gut and other parts of your body change as you grow and develop, and how hormones may change these microbes.

We are interested in enrolling healthy youth & young adults who are 8 to 24 years old. To participate, you can be transgender, gender non-conforming, or cisgender.

If you participate, you will be in this study about 2 ½ years. Study visits are every 3 to 6 months, and will include:

- Providing samples
- Answering questions about what you eat & things you do
- Measuring height, weight, blood pressure, & body changes
- Getting information from your medical record

You will be compensated for your time at each visit. Being in the study is voluntary and will not change your medical care.

IF YOU ARE INTERESTED, PLEASE ASK YOUR PROVIDER OR
CONTACT OUR COORDINATOR FOR MORE INFO:
