Reframe Washington, D.C.

Reframing Interpersonal Youth & Young Adult Firearm Violence & Injury in the Nation's Capital

Stories of lived experience have a transformative power that allows us to see the world differently. Join AFFIRM for an evening of storytelling with Native Washingtonians and for the sharing of knowledge and experiences from National trauma experts to reframe the conversation of youth and young adult violence and firearm injury in our Nation's Capital. Our youth are our future. Together, we can create new healthcare provider-community partnerships and 'systems of care' to make our communities safe, health-promoting places to live for our youth - and all.
