Funding Available for Research in Women's Health: The Iris Cantor-UCLA Women's Health Center Executive Advisory Board / CTSI Young Investigator Award

**February 2026 Announcement
Period of Award September 1, 2026 through August 30, 2027**

Young Investigator funding is available for one doctoral level investigator (must have an M.D., Ph.D. or dual degree) or post-doctoral student engaged in research related to women's health at UCLA. UCLA includes the Westwood/Santa Monica Campus, Cedars-Sinai Medical Center, LA BioMed at Harbor-UCLA, and Charles R. Drew University of Medicine and Science. All applicants must have a sponsoring principal mentor who holds a UCLA faculty appointment.

Funding from the Iris Cantor-UCLA Women's Health Center/UCLA National Center of Excellence in Women's Health must be used in a manner consistent with the mission of the Center, described below:

The Iris Cantor-UCLA Women's Health Center/UCLA National Center of Excellence in Women's Health seeks to promote comprehensive health care for women by providing support for research to understand human sex differences in health and disease and medical issues and diseases unique to women, as well as to develop and test clinical interventions for women. An equally important component of the Iris Cantor-UCLA Women's Health Center/UCLA National Center of Excellence in Women's Health mission is training future leaders in women's health research. Specific aims include:

- To encourage and support interdisciplinary research in the field of women's health and gender-based medicine, including:
 - To study medical issues (including reproductive issues) and diseases unique to women or more common in women.
 - To use established methods of health, utility, and cost measurement to assess and suggest ways to improve the cost effectiveness of clinical interventions for women.
 - To promote research on sex at the cellular level, including how genetic sex differences influence cells, organs, organ systems, and organisms.
 - To study sex differences across the life span.
 - To study sex differences and similarities for human diseases that affect both sexes.

- To train researchers capable of leading and conducting research programs that are consistent with the mission of the Iris Cantor-UCLA Women's Health Center/UCLA National Center of Excellence in Women's Health.
- To extend resources into the UCLA campus to increase the quality of women's health research throughout the campus and to attract new and established researchers into women's health research.
- To study a wide range of populations in these research efforts, including women of diverse racial and ethnic backgrounds, and those who have been traditionally underrepresented in research studies.
- To translate research findings into improvements in health care practice for women.

Co-Sponsorship: The UCLA Clinical and Translational Science Institute (UCLA CTSI) is co-sponsoring this award made available by the Iris Cantor-UCLA Women's Health Center. The CTSI provides the infrastructure to bring UCLA innovations and resources to bear on the greatest health needs of Los Angeles and the nation. It is a dynamic partnership among UCLA Westwood, Charles Drew University of Medicine and Science, Los Angeles Biomedical Institute at Harbor UCLA Medical Center, the Burns and Allen Research Institute at Cedars-Sinai Medical Center, and our Los Angeles community. It is one of more than 60 NIH-funded CTSIs nationwide.

Young Investigator Award Funding Amount Available: \$20,000 for one-year (non-renewable).

Letter of Intent and Supporting Materials Packet and Timeline

Candidates interested in applying for the Young Investigator Award must submit a Letter of Intent and supporting documentation packet. This submission must include:

1. Applicant contact information
2. One-page letter of intent that covers:
 - a. Summary of current research
 - b. Long range research goals and plans for future research
 - c. Brief budget overview, specifying how the Young Investigator funds would be used
3. CV and NIH biosketch of Young Investigator Award applicant
4. NIH biosketch of sponsoring mentor
5. One letter of support from the sponsoring mentor only; no additional letters will be accepted

Allowed use of funds: Funding may be requested for any purpose which meets the scientific advancement needs of the investigator and complies with UCLA policies for expenditure of funds.

Letters of intent and supporting documentation packets will be reviewed by a scientific committee. Criteria for an invitation to submit a full application are:

- (a) Potential of the applicant's work to further research in women's health;
- (b) Credentials of the applicant and sponsoring mentor;
- (c) Relatedness to the Center mission.

Priority for the Young Investigator Award will be given to applicants whose research trajectory makes it likely that they will qualify for a research faculty position at UCLA or at another academic medical center or research institute. Future research goals should be consistent with the mission of the Iris Cantor-UCLA Women's Health Center/UCLA National Center of Excellence in Women's Health.

Successful applicants may be asked to attend a team science training.

How to Submit Letter of Intent and Supporting Materials Packet

- Items 1-5 listed above should be e-mailed to Sophie Viray, SophieViray@mednet.ucla.edu; (310-794-8063).
- All application materials must be received by **noon, Monday, March 16th, 2026**; materials received after that date/time will not be considered.
- Submission will undergo scientific review, and the selected candidates will be asked to submit a full proposal.
- Invitations for submission of a full proposal will be sent by **Monday, April 6th, 2026**. Instructions for submitting a full Young Investigator Award proposal will be included with that invitation.
