

Thank you for considering the UCLA Health Alzheimer's and Dementia Care (ADC) Program for your patient referrals.

We are currently accepting referrals for patients who:

- Have a confirmed diagnosis of Alzheimer's disease or other types of dementia
- Are not enrolled in hospice care
- Are not residing in a long-term nursing home (Assisted Living, Board & Care are accepted)
- Have Medicare Part A and Part B (excludes Medicare Advantage plans)

The ADC Program provides services for patients residing in designated regions of Los Angeles County and Ventura County. For specific regional areas within these counties, please contact the program directly.

To proceed with a referral, we require the following information to be faxed to 424-483-5850:

- Patient's face sheet and demographics
- Caregivers contact information, if applicable
- Insurance information (for outside referrals, the ADC Program is accepting patients with Medicare Part A&B primary insurance only)
- Documentation confirming the diagnosis

Please inform your patient they will need to create a UCLA Health patient profile before proceeding with scheduling an initial appointment. Please call 310-319-3222 and create the profile with a Patient Communication Representative.

The UCLA Health ADC Program **does not** provide secondary diagnosis confirmation. If your intent is to refer the patient for a diagnostic confirmation, please reach out to the UCLA Health Neurology department at 310-794-1195 or the UCLA Health Geriatrics department at 310-206-8272.

If you have any questions or need further assistance, please contact us.
