

## Gynecologic Pathology Grossing Guidelines

**Specimen Type:** PARTIAL VULVECTOMY (for tumor)

**Gross Template:**

**MMODAL COMMAND:** “INSERT VULVA”

It consists of a [*partial/total/simple/radical/subcutaneous*\*\*\*] vulvectomy measuring [*\*\*\* x \*\*\**] cm, and is excised to a depth of [*\*\*\**] cm. [*Provide orientation*\*\*\*]

The epidermis is remarkable for [*Describe any lesions – including size, type, borders, color, shape, distance to all margins*\*\*\*]. The specimen is sectioned to reveal [*describe cut surface and depth of invasion and distance of mass to deep margin*\*\*\*].

[*Describe remaining cut surface and presence of satellite lesion(s)*\*\*\*]. [*The specimen is entirely submitted/representative sections are submitted*\*\*\*] A gross photograph is taken.

[*insert cassette summary*\*\*\*]

**Cassette Submission:** 15-20 cassettes

- At least 3 sections of tumor, including sections showing deepest area of invasion and relationship to closest margin of resection.
- Sections of entire lateral margin of resection.
- Section of entire vaginal margin of resection.
- Sections of any skin surface with altered coloration and texture.
- Sections of uninvolved skin from right and left labia majora and minora, and clitoris.
- Sections of lymph nodes, separately labeled.
- **Take gross photograph**
