

Later-life interventions to reverse/compensate for effects of early life adversity

Symposium and Roundtable at the *Developmental Origins of Health and Disease (DOHaD)* 2017 Conference, Rotterdam, Netherlands, October 17, 2017

Chair(s): Keith Godfrey/Chris Power

Objectives of the symposium:

The symposium will outline the Reversibility Network goals and feature talks from two Network investigators, followed by open discussion with DOHaD delegates to disseminate thinking about the study of later life reversibility of risk associated with early adversity and its importance to the broad DOHaD audience.

- Introduction to NIA/ESRC/BBSRC Network on Reversibility of Early Life Adversity Effects on Later Life Health – Chris Power, University College London
- Measurement of Childhood Adversity and its Dimensions – (Jeanne Brooks-Gunn, Columbia University)
- Reversibility – New Approaches to Intervention in Later Life – (Eric Loucks, Brown University)
- Round Table Discussion
