

Adult Congenital Heart Association

Webinars Presents:

Ask an ACHD Specialist: The ABCs of Telemedicine – Part 1

Thursday, May 28, 2020, 7 p.m. – 8 p.m. EDT

Presenters: Arwa Saidi, MB, BCh, MEd, Jonathan Cramer, MD, Marc Cribbs, MD, Camille Richards, MSN, FNP-BC, and Ryan Stephens, DNP(c), FNP-C, MBA

About the Webinar

Telemedicine is the wave of the future. It makes it possible for your healthcare provider to evaluate, diagnose, and treat you wherever you are using remote technologies, like audio and video. Telehealth includes the aspects of telemedicine, but at the same time, has a broader definition. You might be thinking, especially during this unexpected time of uncertainty, “What does all this mean for me? Will I ever see my healthcare provider in person again? How will he/she examine me? How will I get my blood work or other test done? Do I need special equipment for a telemedicine visit? What about payment and insurance?” These are only a few of the many questions that will be answered by a panel of ACHD specialists on this webinar. You don’t want to miss this.

He is a Heart to Heart Peer Mentor with ACHA.

About the Adult Congenital Heart Association

The Adult Congenital Heart Association (ACHA) is a national not-for-profit organization dedicated to improving the quality of life and extending the lives of adults with congenital heart disease (CHD). ACHA serves and supports the more than one million adults with CHD, their families and the medical community—working with them to address the unmet needs of the long-term survivors of congenital heart defects through education, outreach, advocacy, and promotion of ACHD research. For more information about ACHA, contact (888) 921-ACHA or visit www.achaheart.org.

Sponsorship support provided by Actelion Pharmaceuticals US, Inc.
