

ACHA Webinars Presents:

Living Life Fully Post-Mustard or Senning in the Adult TGA Patient

Tuesday, May 13, 2014, 7 p.m. – 8 p.m. EDT

**Presenter:
George Lui, MD**

About the Webinar

Were you born with transposition of the great arteries (TGA) and have you had a prior Mustard or Senning procedure? Have you ever had or been told about rhythm issues or heart failure? Have you heard about the Mustard/Senning takedown and arterial switch procedure? If so, you won't want to miss this webinar. Dr. George Lui, Medical Director of the Adult Congenital Heart Program at Stanford, will talk about life post-Mustard/Senning in the patient with TGA. Mark your calendars!

About the Speaker

George Lui, MD, is the Medical Director of the Adult Congenital Heart Program at Stanford, a combined program between Lucile Packard Children's Hospital and Stanford Hospital & Clinics. Dr. Lui is also appointed Clinical Assistant Professor of Cardiovascular Medicine and Pediatric Cardiology at Stanford University School of Medicine. Dr. Lui is an expert in the field of adult congenital heart disease and has gained national recognition for both his clinical work and research. His research interests include management of adults with congenital heart disease, pregnancy and congenital heart disease, adolescent transition to adult care, and echocardiography. Dr. Lui currently serves on the ACHA Medical Advisory Board and is a Fellow of the American College of Cardiology and a member of the American Heart Association and International Society for Adult Congenital Heart Disease.

About the Adult Congenital Heart Association

The mission of the Adult Congenital Heart Association (ACHA) is to improve and extend the lives of the millions born with heart defects through education, advocacy and the promotion of research. If you would like to find out more about our programming, visit our website, www.achaheart.org. To support ACHA's mission to improve and prolong the lives of heart defect survivors, you can make a donation on our website.

This webinar was made possible in part by unrestricted educational grants from Actelion Pharmaceuticals US, Inc., Gilead Sciences, St. Jude Medical Foundation and AstraZeneca.
