MEDICAL
EDUCATION

DAVID GEFGEN SCHOOL OF MEDICINE at **UCLA**

This course explores the most challenging management problems facing the practicing urologist. Distinguished faculty present current information and techniques in female urology, reconstructive surgery, overactive bladder, incontinence, management of renal stones, endourology, laparoscopy and robotics, urologic oncology (including kidney, prostate, bladder, and ablative focal therapies), medical therapy for BPH, interstitial cystitis, prostatitis, and pediatric urology. The conference emphasizes interaction between participants and faculty and allows ample time for case presentations and group discussions, ensuring an outstanding educational experience for attendees. The goal of the conference is to provide attendees with new information that they can directly apply to their clinical urology practices.

AT THE COMPLETION of this program, participants should be better able to:

- Assess and correct various problems with incontinence, pelvic prolapse, voiding dysfunction, and bladder pain in the adult
- Manage prostate, kidney, and bladder cancer
- Understand the emerging role of focal ablative therapies for prostate cancer
- Evaluate and treat upper tract urinary calculi
- Assess and treat a variety of pediatric urologic conditions
- Understand the latest developments in the management of interstitial cystitis, prostatitis, BPH, and infertility
