WESTWOOD UPDATE:

Department of Radiology HIFU-MRI Equipment Upgrade
Non-Invasive Technology Improves Women’s Health

In April 2019, the Department of Real Estate | Planning, Design and Construction successfully installed a new General Electric High Intensity Focused Ultrasound (HIFU) MRI in Suite B165-78 at 200 Medical Plaza. The HIFU upgrade is the only non-invasive treatment option for women with symptomatic uterine fibroids unresponsive to most medical treatments. The three-dimensional multi-planar anatomic imaging and thermal monitoring capability of MR imaging combined with the therapeutic thermal-based mechanism of HIFU safely and effectively ablates limited volume classical fibroids. This technology is cutting edge in preventative medicine. The equipment is scheduled for licensing Summer 2019. Thank you to the Departments of Radiology, Radiation Oncology, Facilities, EVS, ISS and Campus ITS for coordination during construction and installation.

SANTA MONICA UPDATE:

Expansion of Rehabilitation Services in Santa Monica
Licensed Clinic Opens Fall 2019

Santa Monica Outpatient Rehabilitation Services located at 1131 Wilshire Blvd Suite 200 and 202 is expanding to include Speech Pathology, Audiology and Occupational Therapy along with existing Physical Therapy, Prosthetics and Orthotics services. The licensed clinic opens for patient care in Fall 2019 with construction completion this summer. The renovated space will include two audiology testing booths and will enable UCLA Health to expand Pediatric Speech Pathology in the Santa Monica area. The expansion of rehab services is part of UCLA Health’s commitment to the development of outpatient services in the West Los Angeles area. Thank you for your patience during renovation.
OFF CAMPUS UPDATE:

New South Bay Location for Manhattan Beach Pediatrics
Open for Patient Care

UCLA Health Pediatrics in Manhattan Beach relocated from 2501 N. Sepulveda Blvd. to a beautiful, new medical office building approximately one mile south at 1000 N. Sepulveda Blvd. The new location is clean and bright with lots of windows, wood-look finishes, pops of color and cheerful artwork that appeals to children and adults alike. After much unanticipated delay with the owner getting the core and shell permitted and erected, UCLA Health Pediatrics is delighted to finally transition over to this larger, updated space with great access and plenty of parking.

Calabasas Medical Office Building
UCLA Health | MPTF and Blood Draw Open for Patient Care
Pediatrics, Primary and Specialty Care Coming Soon

The UCLA Health | Motion Picture and Television Fund (MPTF) Primary Care and Blood Draw Laboratory is now open for patient care at the Calabasas Medical Office Building located at 26585 Agoura Road. UCLA Health Pediatrics, Primary and Specialty Care will open in July 2019. Over the following two years, the building will be improved to include an Imaging Center (Interventional Radiology, MRI, PET/CT, Ultrasound, and X-ray); a licensed Ambulatory Surgery Center (including three operating rooms); Ophthalmology; Urology – Obstetrics & Gynecology; Head & Neck (including Audiology and fitting room); and a regional Sterile Processing Department. A gurney-sized elevator will be added for servicing the clinics.

UCLA Health Breast Surgery Office Relocates to SMMOB
Consolidation of Women’s Health Services

Construction and relocation is complete for the Santa Monica Breast Surgery Office. The office moved from 1245 16th Street, Suite 312 to the Santa Monica Medical Office Building located at 1223 16th Street, Suite 3100. With this move, the Breast Surgery clinic is now in the same building as Breast Imaging Services, Radiation Oncology, as well as outpatient surgical services and includes the addition of ultrasound and mammography within the clinic. The relocation greatly improves the patient experience to deliver personalized, multidisciplinary breast cancer care in a compassionate and supportive environment.
